**Media is how we entertain,
communicate, and learn.**

That's what we're building.

Gemini inputs and outputs

GenMedia Models

Audio Models

Nano Banana

Nano Banana 2

Workhorse

Fastest generation times without compromising quality

Faster & Cheaper

5s faster, 50% lower cost. 512px option

Digital Graphic Assets

Isolated assets with high text accuracy

Nano Banana Pro

Geared at complex prompts

Complex flows - product recontextualization and reasoning

Premium Quality

Optimized for top-tier image quality

Physical Design Context

Mimics physical prints and UI screens

Aspect ratios and resolutions for all your projects

512px

4k

Search Grounding

Search the web for Naina Raisinghani and create an infograph of my career journey in illustration style

Grounding with Google Search for images

Prompt: Generate a watercolor of the Ayub bridge
What? A bridge in Sukkur, Pakistan

Nano Banana Pro (Search grounding only)

Nano Banana 2 (Search + Image Grounding)

Tips for Building with Nano Banana

1

Use multi-turn editing

Refine your creations through sequential prompts and feedback loops

2

Iterate on low resolution then upscale

Save time and resources by finalizing composition before high-res rendering

3

Use references and grounding

Leverage real-world data and images to ensure accuracy and stylistic consistency

4

Get transparent backgrounds

Generate assets ready for compositing.

5

Generate multiple images at once

Increase creative throughput with batch generation

6

Use batches or flex

Optimize for high-volume tasks using flexible API options

Vevo

Veo 3.1 Lite

Imagining, prototyping, and assisting at scale

Tips for Building with Veo

1

Write descriptive prompts

Include characters, action, context, camera movement, lighting, atmosphere, and emotional mood

2

Capitalize on advanced reference features

Leverage multi-modal inputs to guide generation with high precision

3

Use JSON prompting

Structure complex requests for more reliable and predictable outcomes in production

A surreal landscape featuring rolling hills covered in tall, golden-brown grass. In the center of the sky, a bright, glowing ring of light, resembling a portal or a ring of fire, frames a view of the horizon. The sun is visible through the center of the ring, casting a warm, golden glow across the entire scene. The sky is a mix of soft orange and pale yellow, with some wispy clouds. The overall atmosphere is dreamlike and ethereal.

Gemini Omni Flash

create anything from any input – starting with video.

Gemini Omni Flash core components

World Knowledge

Simulate real world logic

Draw on real-world history and culture

Create text, sync'd with the action

Create more realistic and rich audio

Native Multimodality

Reference anything

Character consistency

Transfer motion and styles

Translate drawings into videos

Conversational Editing

Multi-Turn video editing

Swap characters, environments,
and objects

Change the camera angle

Change the action

Lyrria

Lyria 3 and Lyria 3 Pro

Track Length

Lyria 3 generates 30-second long songs, ideal for rapid prototyping and short-form assets. Lyria 3 Pro supports compositions up to three minutes long

Vocal Support

Supports vocal conditioning in eight languages
(English, German, Spanish, French, Hindi, Japanese, Korean, and Portuguese)

Controls and Conditioning

Lyria 3 Pro includes advanced controls for timed lyrics and tempo control through natural language descriptions

Multi-modal inputs

You can generate music using text or up to 10 reference images

Lyria Core Prompting Framework

**[Timed Song Structure] + [Genre & Style] + [Mood & Energy] + [Instrumentation] +
[Tempo & Rhythm] + [Vocal Style & Language] + [Lyrics]**

THE PROMPT

"A 1980s-style synth-pop track, tense and suspenseful, featuring shimmering synthesizers and a driving electronic pulse at 120 BPM. A commanding male baritone with a gravelly, soulful voice."

TIMED SONG STRUCTURE

[Intro] (0:00 - 0:15):

Start with a quiet piano and soft synth pads.

[Verse 1] (0:15 - 0:45):

Bring in a clean, driving beat.

[Chorus] (0:45 - 1:15):

Explode into a massive, anthemic wall of sound.

Lyrics:

[Insert lyrics here or describe the theme]

Text-to-speech

Gemini 3.1 Flash Text-to-speech

The latest text-to-speech model from Google DeepMind, offering unprecedented controllability, expressiveness, and audio quality

Granular audio tags

Allows natural language commands directly in text to guide vocal style, pace, and delivery

"Director's chair" controls

Scene direction: Set physical and emotional environments for multi-turn natural interactions

Speaker specificity

Cast unique profiles and use inline tags to change expression mid-sentence

Global scale

Supports 70+ languages with style and pacing optimizations for 24 core languages

Tips for building with TTS

Follow the right format:
Treat your prompt like
a script with director's notes
(Tone, Speed, Character).
Always start with “read this”

Do not use the raw
voices, prompt them

Mix prompts to create
more than 2 voices
