Typical Workflow

Typical Workflow with AI Assistance

Typical Workflow with AI Agent

You AI agent is like an intern

Engine Architecture
Module & naming rules

Security & Style
Studio coding standards

Git & PR Workflow
Branching & commit policies

Updating Jira
So your producer is happy

Documenting
So your QA team is happy

Shaders & VFX
Render pipeline skills

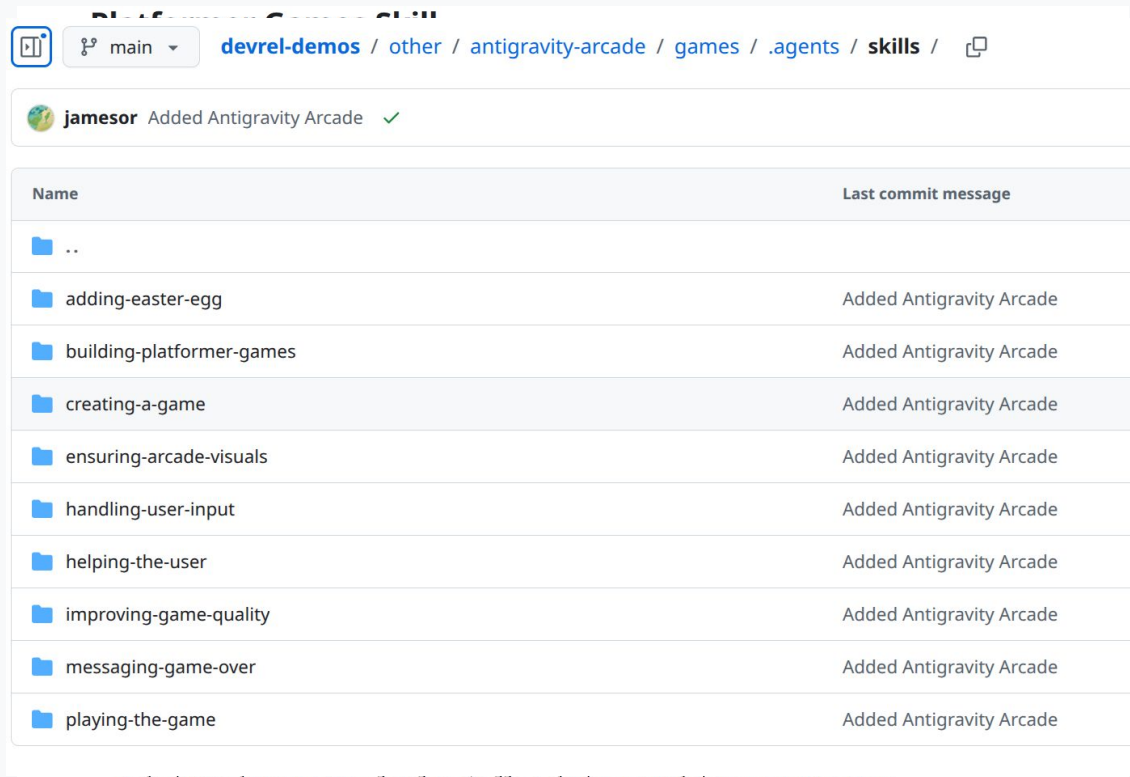

CI & Unit Tests
Test runners & verification

Audio & Physics
Sound & collision toolkits

How to teach you agent with skills

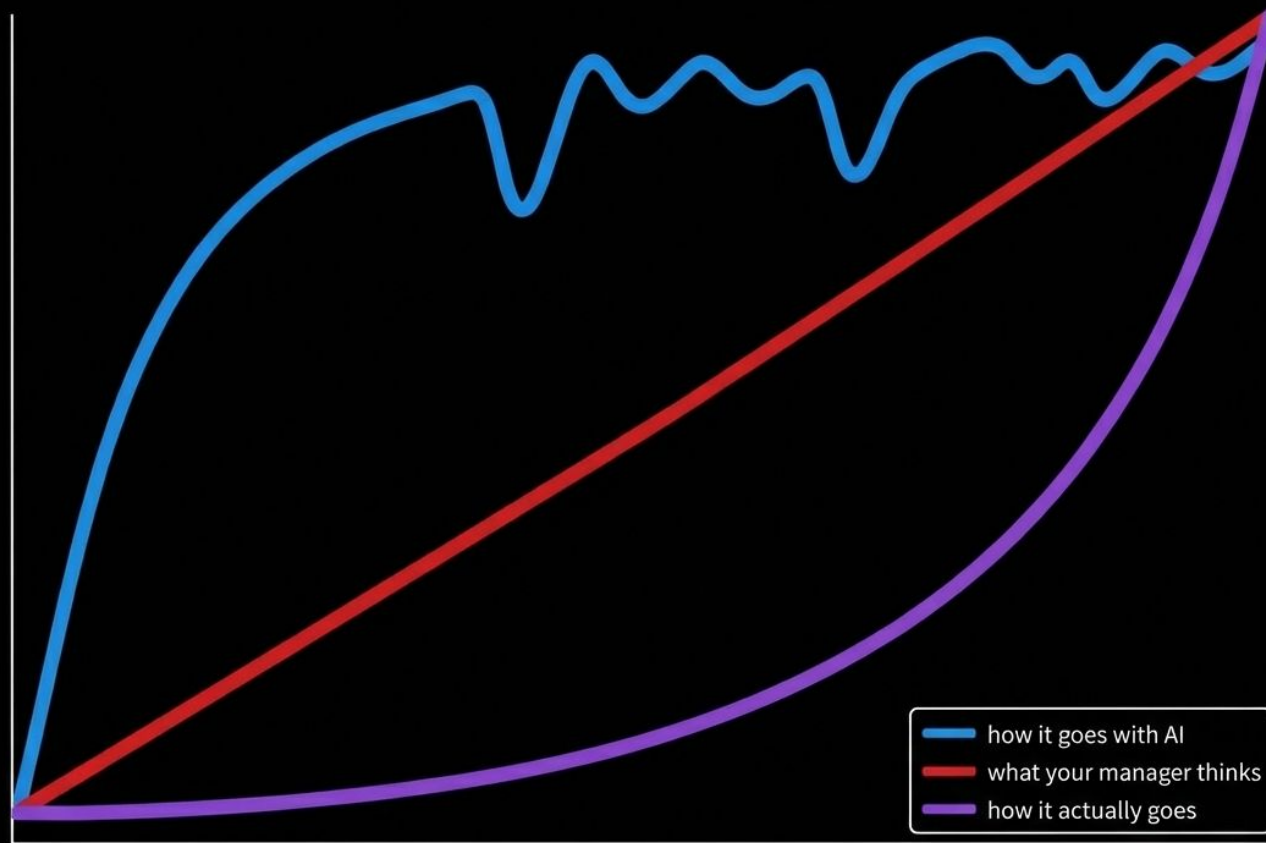

The screenshot shows a GitHub repository page for 'devrel-demos'. The breadcrumb trail is: devrel-demos / other / antigravity-arcade / games / .agents / skills. A commit by 'jamesor' is shown with the message 'Added Antigravity Arcade' and a green checkmark. Below this is a table with two columns: 'Name' and 'Last commit message'. The table lists ten skills, each with a folder icon and the message 'Added Antigravity Arcade'.

Name	Last commit message
..	
adding-easter-egg	Added Antigravity Arcade
building-platformer-games	Added Antigravity Arcade
creating-a-game	Added Antigravity Arcade
ensuring-arcade-visuals	Added Antigravity Arcade
handling-user-input	Added Antigravity Arcade
helping-the-user	Added Antigravity Arcade
improving-game-quality	Added Antigravity Arcade
messaging-game-over	Added Antigravity Arcade
playing-the-game	Added Antigravity Arcade
