Producer at Ubisoft:**
Assassin's Creed Odyssey,
Immortals Fenyx Rising

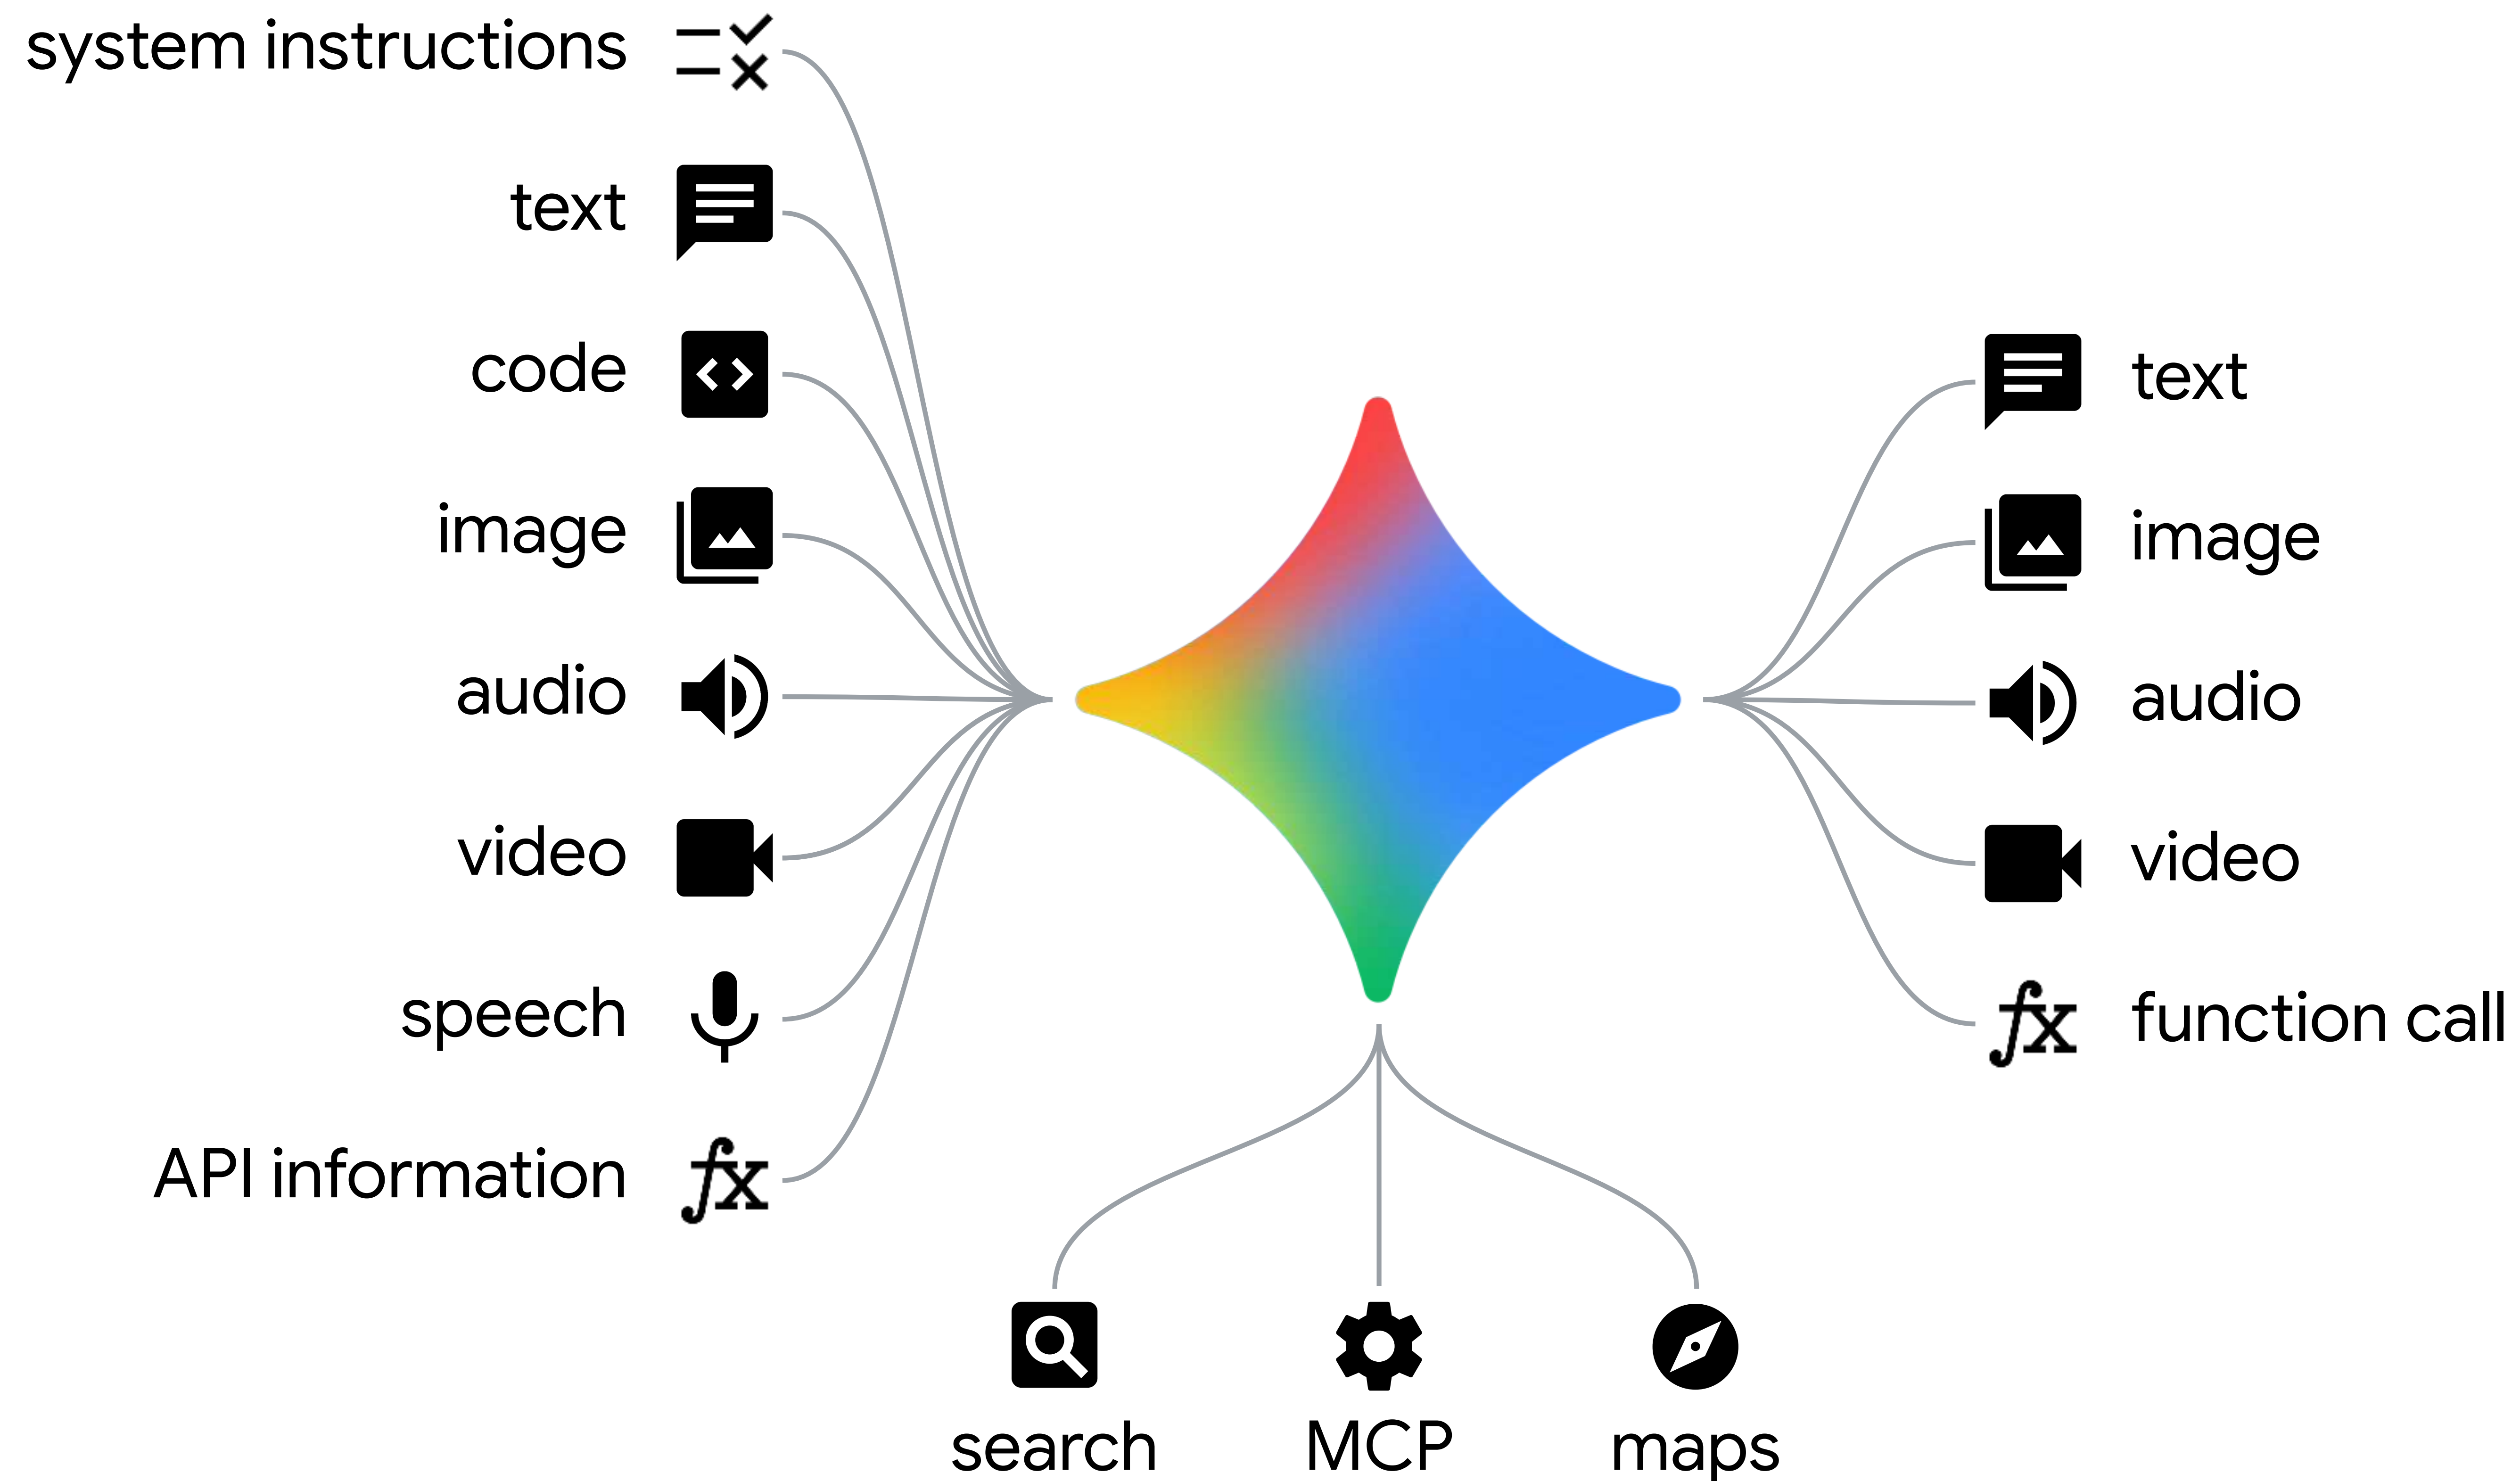

Current Role:
Developer Advocate
Google DeepMind

Google Stadia:
Supported 30+ Games

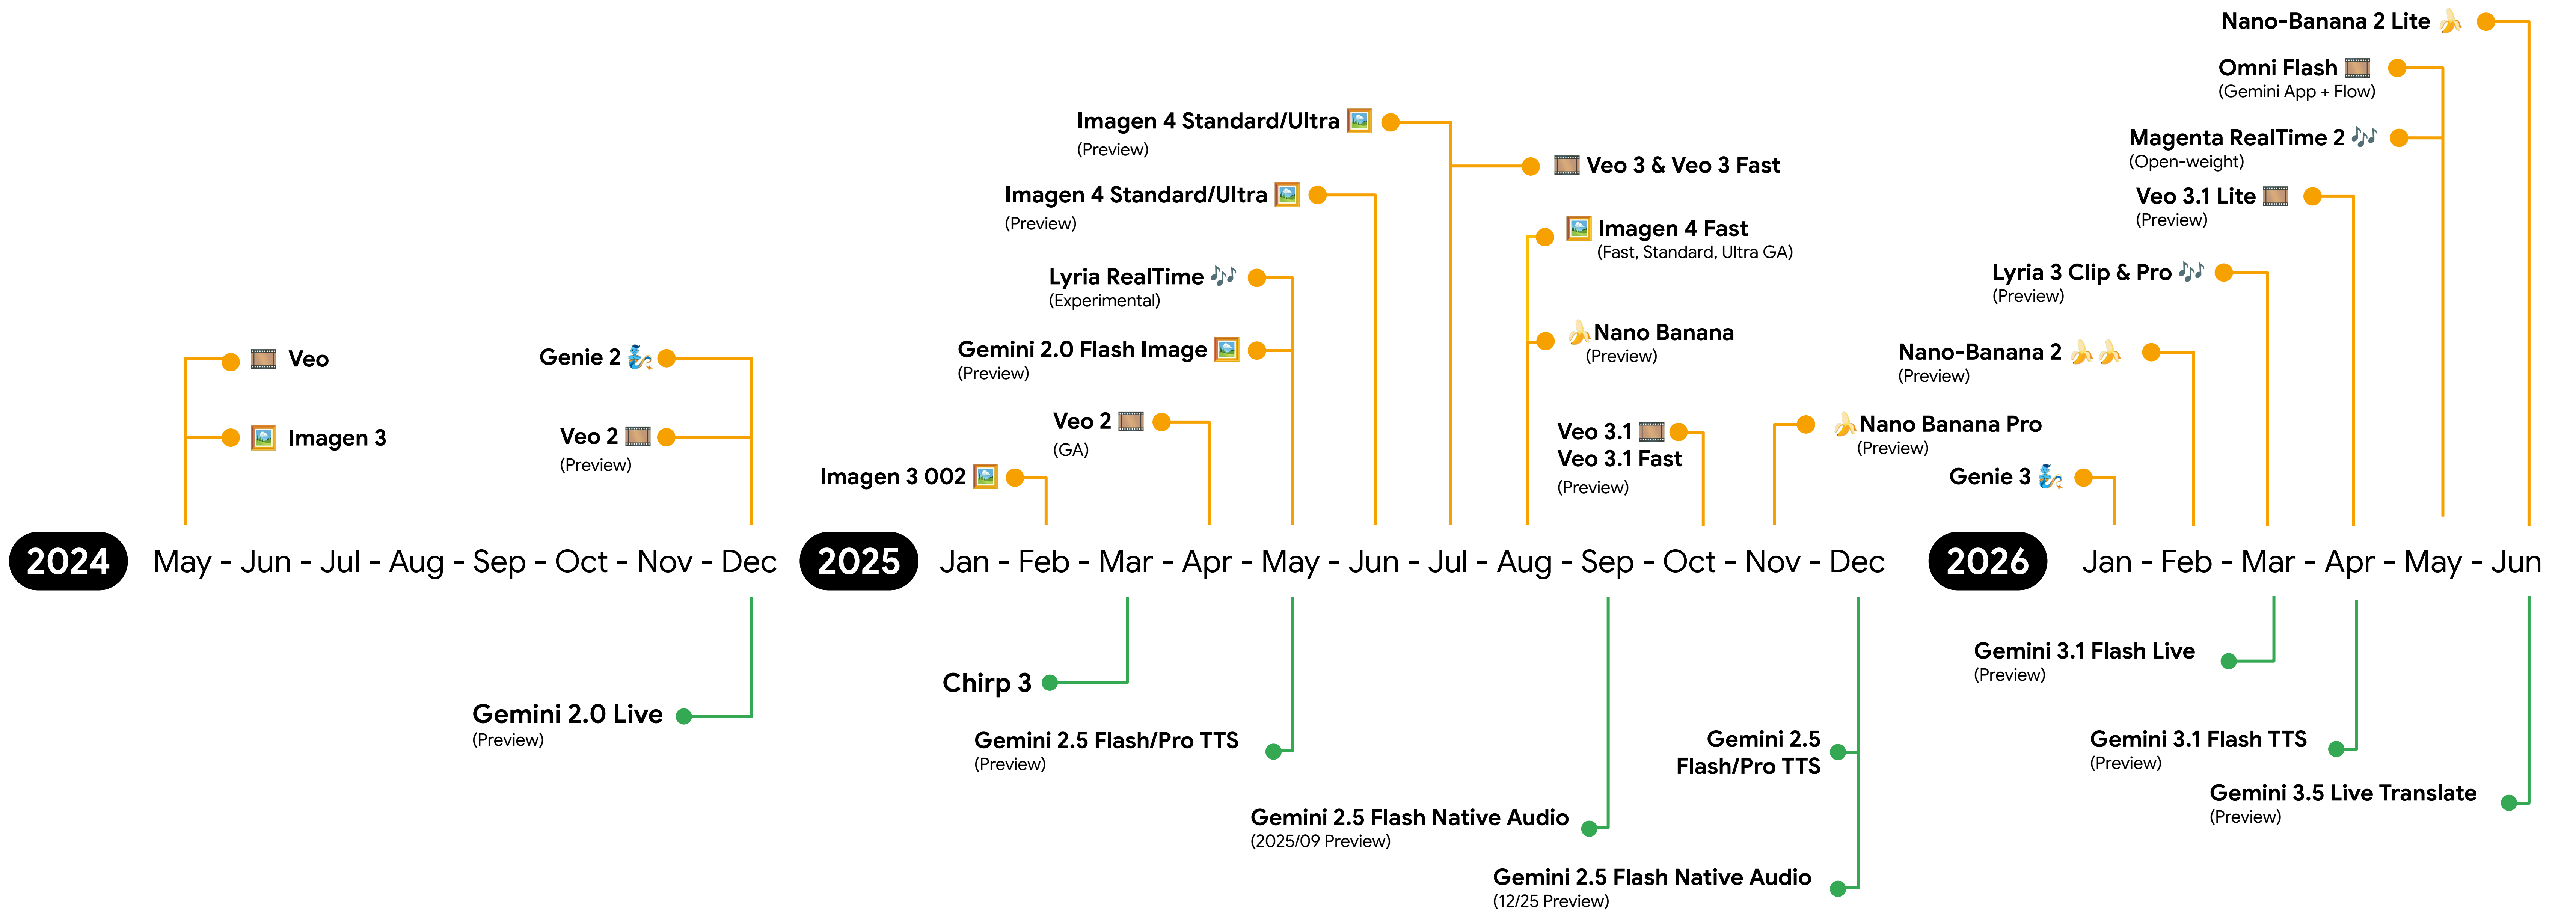

Open your phone.
Any website. Any textbook.
Media is how we entertain,
communicate, and learn.

That's what we're building

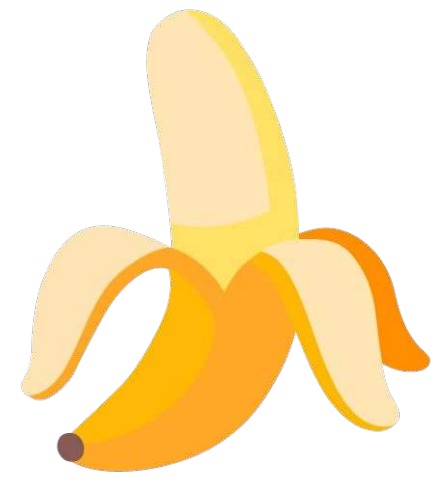

Gemini inputs and outputs

GenMedia models

Audio models

Nano Banana

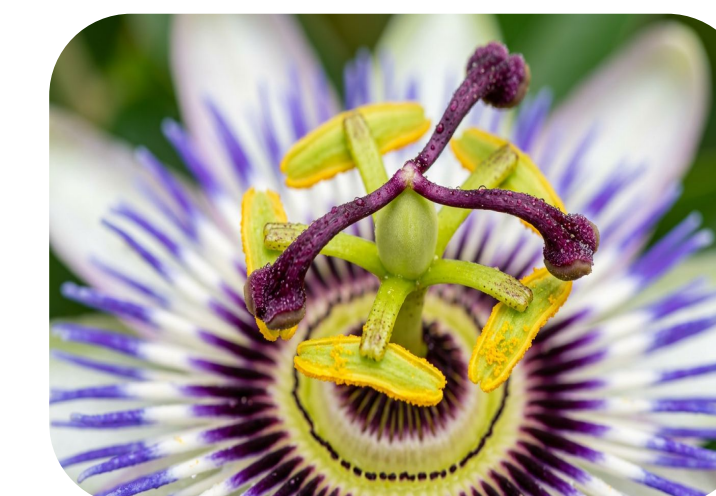

Aspect ratios and 521px to 4K outputs for any project

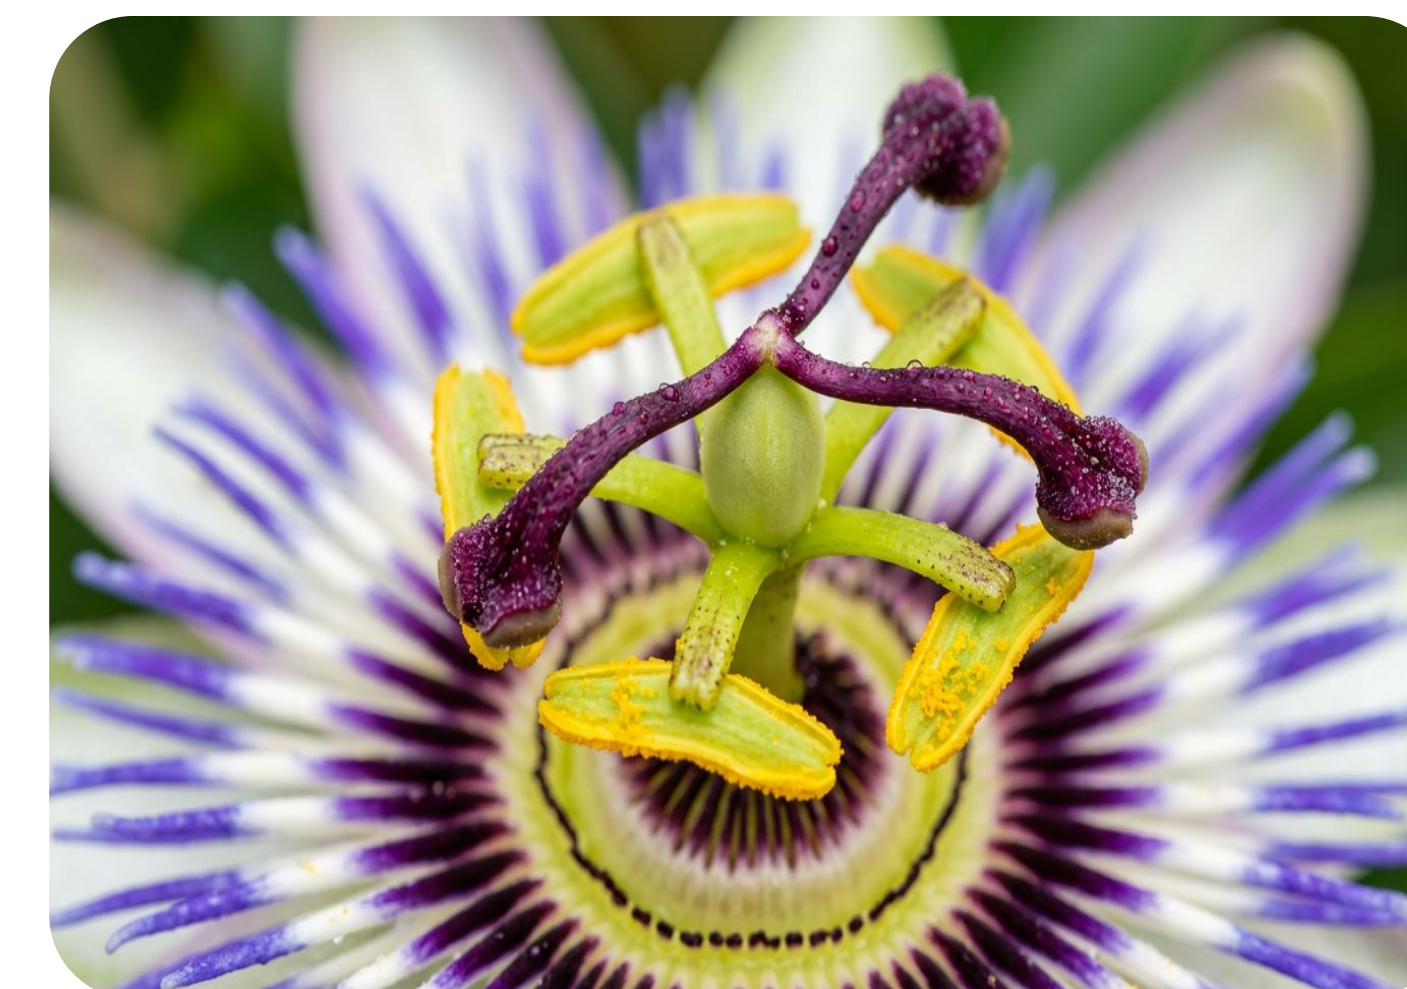

512px

1k

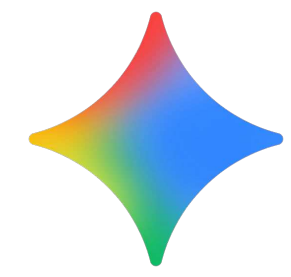

2k

4k

Grounding with Google Search for images

Prompt: Generate a watercolor of the Ayub bridge
What? A bridge in Sukkur, Pakistan

Nano Banana Pro
(Search grounding only)

Nano Banana 2
(Search + Image Grounding)

Gemini Omni Flash

Create anything from any input – starting with video.

Gemini Omni Flash core components

World knowledge

Simulate real world logic

Draw on real-world history and culture

Create text, sync'd with the action

Create more realistic and rich audio

Native multimodality

Reference anything

Character consistency

Transfer motion and styles

Translate drawings into videos

Conversational editing

Multi-turn video editing

Swap characters, environments,
and objects

Change the camera angle

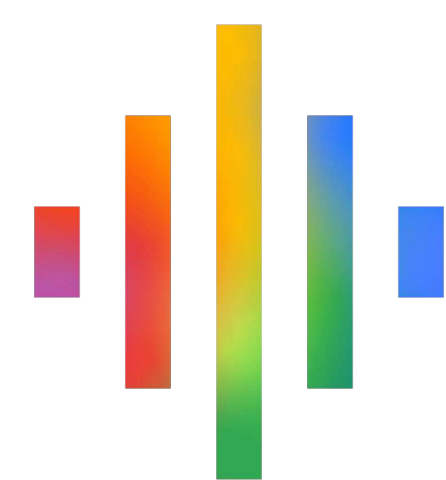

Change the action

Lyria 3

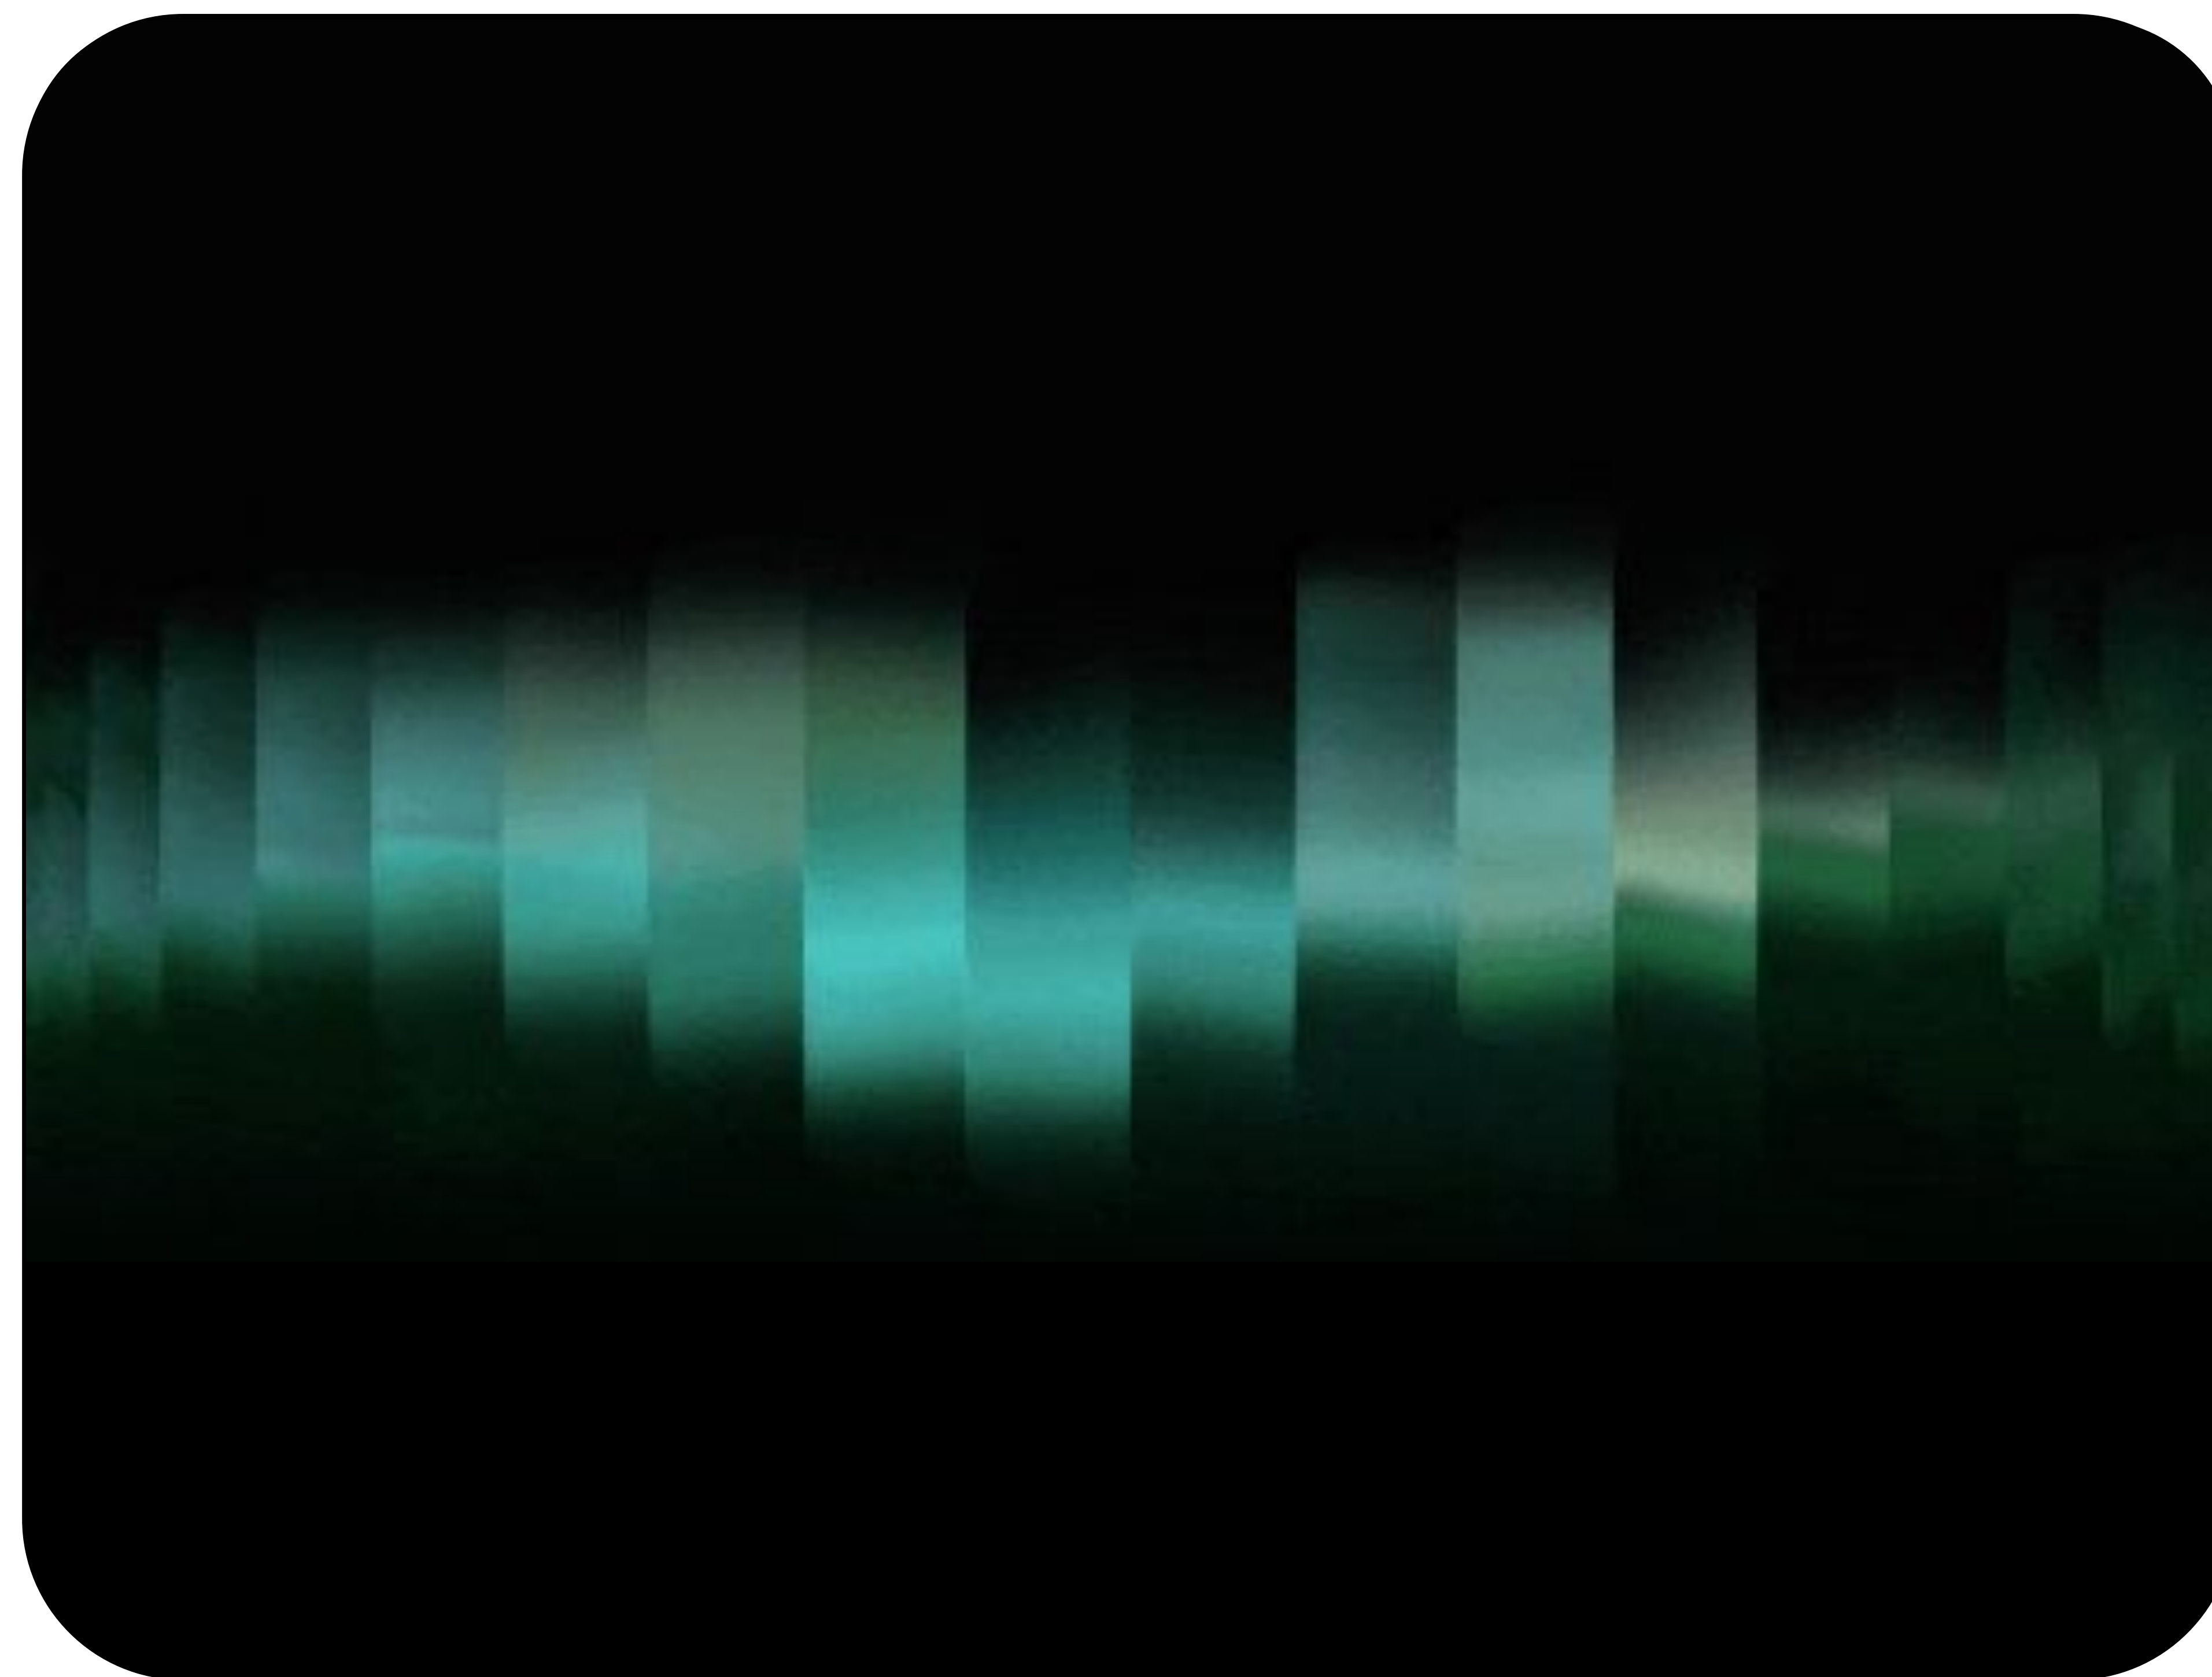

Our latest music
generation model

The text "Lyria 3" is displayed in a large, bold, sans-serif font. The text is a vibrant green color and is centered on a background that features a smooth, vertical gradient from a light green at the top to a slightly darker green at the bottom.

Lyria RealTime

Interactive
real-time music
creation model

Build creative apps with the GenMedia suite

Google DeepMind
provides a whole range of
genMedia models:
images, videos, music,
TTS

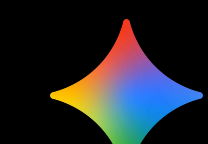

Interactions API are the
best way to chain models
while keeping context

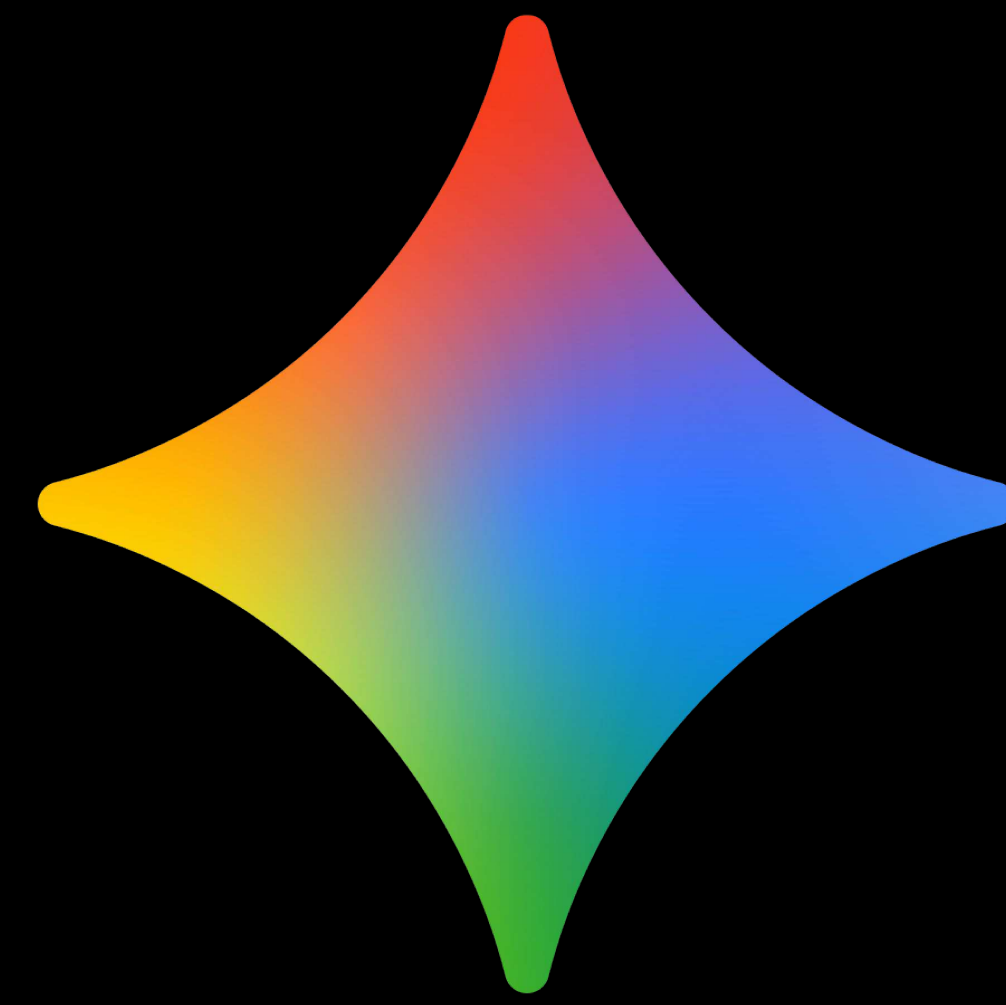

Gemini large context can
process a whole book
